Capabilities Statement

Performance Validation, Inc.
(855)737-3825
www.perfval.com

Established in 1988, Performance Validation’s (PV) core services are providing commissioning, qualification, and quality system consulting support primarily in the highly regulated Pharmaceutical and Medical Device industry sectors. Today, PV is a preferred supplier of some of the world’s largest pharmaceutical companies where lives are dependent on the quality and timeliness of the work we do. Because of our demonstrated integrity, competence, and sense of ownership, PV has been entrusted to operate and test highly complex equipment and systems, represent the user at factory tests, and manage high dollar/schedule critical projects.

New Patient Tower, Surgery Suite, and Power Plant
Indianapolis, IN

Bancroft Architects + Engineers
VA Medical Center – Renovate Ward 1A, Bldg 1
Murfreesboro, TN

Differentiators

- 100% Employee Owned
- 30+ Years of Experience
- Certified Commissioning Professionals
- Service – Our mission is to provide our clients with peace of mind. Your project is our project and we work together as a team, coordinating and communicating with the entire project team, to find solutions.
- Dedication – PV is not a virtual company, staffing agency, or “body shop”. Our technical resources are full-time, salaried professionals, with technical degrees.
- Quality – PV is governed by an ISO9001:2015 based Internal Quality System. PV certifies all Project Leaders on an internally-developed and administered training program based on Project Management Institute principles.
- Competency – PV employees receive continual education on industry best practices and trends and are involved in a variety of professional organizations.
